- Decomposition products may be hazardous to health.
- Avoid exposure and use breathing apparatus as appropriate.
- Cool closed containers exposed to fire by spraying them with water.
- Do not allow runoff water and contaminants from fire fighting to enter drains or watercourses.
- See section 10.

**6. ACCIDENTAL RELEASE MEASURES**

Avoid all sources of ignition (e.g. naked lights, unprotected light bulbs, electric handtools).
- Ventilate the area and avoid breathing vapors.
- Wear protective clothing and self-contained breathing apparatus when dealing with spillage or fire.
- Collect spillage, where practicable, for safe disposal.
- Should be disposed of wastes and empty containers in accordance with regulations made under the control of pollution acts and the environmental protection acts.
- Collect spillage, where practicable, using absorbent material, and dispose of spillage on the floor in a safe manner.
- Keep away from drains, surface- and ground-water and soil.
- Do not allow spills to enter drains or water courses.
- Refer to headings 8 and 13
7. HANDLING AND STORAGE

Handling:
- Keep away from heat, sparks, and flame.
- Keep container closed.
- The product may charge electro statically.
- Operators should wear clothing which does not generate static (at least 60% natural fiber) and antistatic footwear.
- Do not breathe (dust, vapor, mist, gas).
- Avoid prolonged or repeated contact with skin.
- Protection as shown in section 8.

Storage:
- Keep container closed.
- Keep away from heat, sparks, and flame.
- Store in a well-ventilated, dry place away from sources of heat and direct sunshine.
- Do not store above 40 deg.C. (104 deg.F.)
- Avoid prolonged or repeated contact with skin.

8. EXPOSURE CONTROL / PERSONAL PROTECTION

Engineering Measures:
- Prevent vapor build up by providing adequate ventilation during and after use.
- An eye wash facility should be readily available.
- Facilities storing or utilizing this material should be equipped with an eye wash facility and a safety shower.

10. STABILITY AND REACTIVITY

Stability: Stable under recommended storage and handling conditions (see section 7). When exposed to high temperature, may produce hazardous decomposition products such as carbon monoxide, carbon dioxide, oxides of nitrogen and smoke.

Hazardous reaction: Hazardous reaction will not occur.

Condition to avoid: Avoid heating temperatures above 40 deg.C.

Materials to avoid: Keep away from oxidizing agents, strongly alkaline and strongly acid materials in order to avoid possible exothermic reactions.

Hazardous decomposition products: The products decomposed on heating producing their oxide or monomers.
